BUD EXTRACTS / GLYCERIN MACERATES

WHAT ARE GLYCERIN MACERATES?

Glycerin Macerates are extracts obtained by maceration of fresh plant buds, emerging shoots, seeds, rootlets and saps in a solution of water, alcohol and glycerin. The raw material is taken at the peak time of the plant's annual germination (*e.g. in the spring for buds or the autumn for seeds*).

The Macerates are used as remedies in Gemmotherapy for healing a large range of acute and chronic symptoms.

They work on cells' and tissue level, first optimizing elimination, then working further to clean, nourish, and restore the correct organ functions.

These extracts have a pleasant sweet aromatic taste and range in different colors from light golden yellow to deep black.

In France, Belgium, Italy, Germany, they are popularly known as Glycerin Macerates.

WHAT IS GEMMOTHERAPY?

Gemmotherapy is a new branch of Phytotherapy founded in the 60's by the Belgian doctor Pol Henry. Henry clinically studied the effect of a wide range of plant buds and shoots and combined the virtues of the medical plant and all the energy of the bud in its study.

It works great for skin conditions, seasonal allergies, chronic ENT's, asthma, UTIs, migraines, digestive disturbances, sleep difficulties, menstrual irregularities, fertility issues, high blood pressure and many more.

HOW ARE THE GLYCERIN MACERATES USED?

Glycerin macerates are marked as food supplements in 50 ml bottles, which corresponds to a cure of about 60 days. The daily intake is 3x5 drops in between meals. Under normal conditions Glycerin macerates can be stored for 4 years.

Usually serious brands have a range of about 30 different single Glycerin macerates. This range allows to cover the usual spheres of action covered by food supplements such as: articulations, cardio vascular, immunity, energy, detoxification, stress, sleep, digestion, respiration, feminine well being, memory, skin, hair, and nails.

GLYCERIN MACERATES

Latin Name	English Name	Use
Abies Alba Mill.	Silver fir	Bones
Aesculus hippocastanum	Horse-chestnut	Veins
Alnus glutinosa	Black alder	Stomach - Immunity
Betula Alba	Silver birch	Articulations & Flexibility
Carpinus betulus	Hornbeam	Blood platelet
Castanae sativa	Sweet chestnut	Cleansing of lymphatic syst.
Corylus avellana	Common hazel	Lungs
Crataegus laevigata	Hawthorn	Heart
Equisetum arvense	Common horsetail	Articulations
Ficus carica	Common fig	Antistress, sleep, digestion
Fraxinus excelsior	Common ash	Ureic acid
Juglans regia	Walnut	Intestinal flora
Juniperus communis	Juniper	Liver detoxification
Malus sylvestris	Apple	Against hot flushes
Pinus Mugo	Mountain pine	Cartilage
Platanus orientalis	Oriental plane	Acnea

Latin Name	English Name	Use
Populus nigra	Black poplar	Lungs - Immunity
Prunus dulcis	Almond	Kidneys – Cholesterol
Quercus robur	Common oak	Against fatigue
Rosa canina	Dogrose	Immunity
Rubus fruticosus	Blackberry	Lungs and Bones
Rubus Idaeus	Raspberry	Menstruation
Sambucus nigra	Black elder	Digestion and Transit
Sequoia gigantea	Sequoia	Tonus and Bone Mineralisation
Sorbus	Sorb tree	Blood circulation
Tilia tomentosa	Silver linden	Sleep and Antistress
Ulmus campestris	Elm	Skin
Vaccinium myrtillus	Bilberry	Eyesight
Vaccinium vitis-idae	Lingonberry	Women and Menopause
Viburnum lantana	Wayfarer	Lungs
Viscum album L.	Mistletoe	Heart
Vitis Vinifera L.	Grapen vine	Intestinal Transit, Articulations

WHO WE ARE?

AYALI GROUP Ltd. is a Bulgarian company, specialized in the wild collection and extraction of fresh bio-certified plant buds.

We supply in bulk Glycerin Macerates to leading brands and laboratories in Western Europe.

WHY ARE GLYCERIN MACERATES HARD TO PRODUCE?

Top quality Glycerin Macerates are produced from fresh plant buds, collected in the phase when the sap goes up to the buds. The buds have to be hand picked at the very moment when the bud is full of sap and before that it's energy is consumed by the development of the leaves. This means that the time frame to collect the buds is very short.

Further more, buds are very small and are tedious and time consuming to collect. A good hand picker will only collect a few hundred grams for the smallest buds in the range.

WHY WORK WITH US?

We are one of the few suppliers that can offer the whole range of buds.

We keep stock all around the year; if you run out of goods, you will not have to wait until the next season to place your order.

Top quality of the products. We do not make compromises with quality. We guarantee that the buds are macerated fresh. Buds that have been frozen before maceration loose their energy.

We do not stretch the concentration of our Glycerin Macerates for cost-efficiency purposes.

Our Glycerin Macerates are naturally full coloured with intense and long lasting aromatic taste.
